SmartMetric Inc.

www.smartmetric.com

SmartMetric, Inc. (OTC: SMME), recently announced it is adopting cryptocurrency technology to facilitate payments and has moved forward with the planned release of its crypto key storage technology for use with credit and debit cards.

The SmartMetric Crypto Card solution has its own crypto key secure element inside the card protected by firewalled encryption. This allows for the safe storage on the card of encrypted crypto keys in a highly functional manner.

SmartMetric has built inside its crypto payments card significant memory along with a crypto engine inside a secure element chip separate from the secure element used to perform credit and debit card transactions. By having two separated firewalled secure elements we are able to provide much higher security than current card architecture provides while also providing greater memory and added encryption power.

The SmartMetric biometric fingerprint activated credit/debit card is easy to use and allows an easy to enroll in a person's fingerprint. The card holder's fingerprint is stored and encrypted inside the SmartMetric biometric card in a one-time touch and store process. Similar to the simplicity and ease of storing a fingerprint on a mobile phone. SmartMetric secure user storage of the cardholder's fingerprint does not require additional fingerprint reading devices in Bank branches for enrolling fingerprints. This allows the SmartMetric biometric card solution to be easily used by mass card issuers without having to change their distribution methods.

SmartMetric™
PROTECTING THE WORLD DIGITALLY™

PHARMAGREEN BIOTECH, INC.

www.pharmagreen.ca

Pharmagreen Biotech, Inc. (OTC: PHBI), is a cannabis company that is focused on becoming one of the largest producers of hemp and other valuable plant species tissue cultured starter plantlets. With six more States joining the ranks of either medical or recreational cannabis use, the U.S. market just keeps growing. The company believes it is just a matter of time before there is Federal legislation, in the U.S., in favour of legalization.

Pharmagreen has been actively working on developing a network of industry players within the U.S. in support of its business plan. Pharmagreen's mission is to advance the technology tissue culture science and to provide the highest quality,

100% germ free, disease free, and genetically identical plantlets of cannabis, low-temperature storage of plant genetics; extraction, distillation and isolates production of CBD and other Cannabinoid oils, and to deliver unparalleled laboratory-based formulations services to the cannabis industry.

We believe that the market opportunity for cannabis tissue cultured starter plantlets is largely untapped, because most producers still rely on cloning and planting seeds to grow cannabis. Our solution addresses this market opportunity by providing a modern replacement for legacy growing techniques through cutting-edge micro-propagation technologies, which will put Pharmagreen in a unique position to lead the way in the industry.

We are actively working on additional opportunities to develop a plantlet to sale model with our famer(s) in the U.S., who have organic farm land certifications and are eager to work with Pharmagreen in growing the highest quality biomass utilizing Pharmagreen's starter plantlets. The biomass produced from those plants will be processed in Phramagren's extraction facility to produce some of the best cannabis formulations from full spectrum to isolates.

nightfood®

www.nightfood.com

Nightfood, Inc. (OTCQB: NGTF), the company pioneering the category of nighttime snacks for better sleep, recently announced Nightfood's Pickles For Two ice cream that is being featured along with a Double Cheeseburger Papadia from Papa John's in a gift pack as part of a promotional partnership.

"We're honored to have been invited by Papa John's to participate in this national promotion satisfying late-night cravings," commented Nightfood CEO Sean Folkson. "We're excited to be able to introduce our Pickles For Two, and the entire Nightfood brand, to so many new consumers."

The company recently launched the Pickles For Two flavor to satisfy the two most popular pregnancy cravings: pickles and ice cream.

Nightfood was named this year as the official ice cream of the American Pregnancy Association. Nightfood ice cream was developed by leading sleep experts for nighttime snacking with ingredients for relaxation and better sleep. A better choice for men, women, and children of all ages. Nightfood pints feature more protein, fiber, calcium, magnesium, and zinc, and less sugar, less fat, and fewer calories than regular ice cream.

CO2 GRO Inc.

www.co2gro.ca

CO2 GRO Inc. (TSX-V: GROW, OTCQB: BLONF): recently announced that it has sold a CO2 Delivery Solutions™ Commercial Installation to a British Columbia based smaller cultivator for medical Cannabis licensed under the Cannabis Act. Co2 GRO has established considerable success with micro and smaller Cannabis and hemp cultivators across Canada and the U.S.

Growers who operate cultivation facilities under 10,000 sq. ft. of canopy whether indoor, smaller hoop or greenhouses, all benefit from CO2 Delivery Solutions™' with up to 30% yield enhancement and pathogen Perimeter Protection™ while realizing significant CO2 cost savings compared to atmospheric CO2 gassing.

Canada currently has 106 micro-cultivation licensees who can operate facilities with up to 2150 sq. ft. of Cannabis canopy. The U.S. has multiple states that have various regulatory frameworks that accommodate smaller cultivation operations too. On November 4, 2020 Marijuana Business Daily reported the changes in U.S. Cannabis/Hemp legislation could generate \$2.5B USD in additional sales by 2024.
