Black Bird Biotech to Seek EPA Approval of MiteXstream™ Ready-to-Use Formulation

<https://www.otcmarkets.com/stock/BBBT/news/story?e&id=1949356>

About Black Bird Biotech, Inc.: Black Bird Biotech is positioned to exploit market segments with powerful, re-imagined biotech products. Its EPA-registered biopesticide, MiteXstream™, eradicates an array of agricultural pests, including spider mites (a lethal pest in cannabis, grapes, hops, coffee, strawberries and other agricultural crops) and eliminates molds and mildews. MiteXstream™ is a pesticide, but it is not a poison – It's a pesticide re-imagined. The MiteXstream™ Edge: use through the day of harvest without concern for residual "pesticide" violations, including in state cannabis testing.

Company Highlights:

- MiteXstream™ sales are scheduled to begin in early September 2021 in five Western states, with sales in the remaining states to follow during the remainder of 2021 as MiteXstream™ becomes state qualified.
- Black Bird will seek EPA approval of the Ready-to-Use formulation of MiteXstream™, as the company seeks to capitalize on the lucrative home gardening market, where home gardeners battle a wide array of pests, molds and mildews, including powdery mildew, on their house plants or in their flower and vegetable gardens.
- In a display of expected global reach, MiteXstream™, summer field testing on mite-plagued vegetable crops in Israel by International Agri-Chem Company expected to be completed in early October 2021.

"Black Bird Biotech is positioned to exploit market segments with powerful."

AMERICAN INTERNATIONAL HOLDINGS

OTCQB: AMIH
8/9/2021 \$0.0949

About American International Holdings Corp.:

American International Holdings is an investor, developer, and asset manager of diversified, synergistic health and wellness businesses. Today, the AMIH portfolio encompasses telemedicine and other virtual health platforms, subscriber-based primary care and concierge medicine plans, preventative care solutions, and wellness-related assets such as mental & behavioral health services as well as its own proprietary life coaching platform. American International Holdings markets its various services through direct-to-consumer and business-to-business distribution channels. AMIH's focus is on bringing to market technologies and solutions that advance the quality of life for the global community.

Company Highlights:

- Targets the one in four US adults lacking primary care and their employers.
- Digitally focused, capital-efficient, and highly scalable.
- Subscription-based offerings lower costs, drives recurring revenue.
- Synergistic: Multiple cross-marketing opportunities.
- Strong competitive advantage by being created in the digital “new normal” vs industry’s brick & mortar.

THC Therapeutics Exploring Entry Into Silver Market as an Online Precious Metals Dealer

About THC Therapeutics, Inc.:
THC Therapeutics has developed a sanitizing cannabis dryer, the dHydronator®, with multiple design, function, and usage patent protections. The lab tested dHydronator® can sanitize and reduce the moisture content of Cannabis to approximately 10% in only 10-14 hours. The dHydronator is capable of reducing the microbial load of failed cannabis down to passing levels.

Company Highlights:

- THC Therapeutics is one of the only publicly traded (non mining) companies holding physical Precious metals on their balance sheet.
- USPTO has granted all 20 claims on patent protection for the company's herb/plant sanitizing dryer, the dHydronator®.
- dHydronator® development moving forward to the preliminary manufacturing phase.

THC THERAPEUTICS

PHARMAGREEN

OTCPINK: PHBI
8/9/2021 \$0.0208

About Pharmagreen Biotech, Inc.:

Pharmagreen Biotech is in the business of providing the highest quality starter cannabis plantlets through its proprietary tissue culture process, "Chibafreen", to licensed growers and to CBD hemp farmers with its proprietary hemp strain "CBD Dana" for high CBD hemp farming. It also provides other value-added services: plant species identification through DNA testing and certification; live storage of strains using tissue culture low-temperature storage proprietary technology, and extraction of quality cannabinoid oils (CBD, CBG).

Company Highlights:

- Pharmagreen's proprietary design and engineering of the tissue culture starter plantlet production facility has a number of important aspects, such as any plant species can be produced, genetic preservation via live plant tissue storage technology, green and energy-saving construction, and utilizing the latest IoT (Internet of Things) technologies.
- Automation and IoT will provide the level of detail and control required to make the final product predictable, consistent, and more suitable for incorporation into medicine.

"CBD HEMP FARMERS WITH ITS PROPRIETARY HEMP STRAIN "CBD DANA" FOR HIGH CBD HEMP FARMING."

Brookmount Explorations Announces Definitive Agreement to Acquire Canadian Based Gold Project

About Brookmount Explorations, Inc.:
Brookmount is a company focused on the development of a well-structured, geographically diversified platform of gold investments, both operating and investment-oriented. The Company presently operates 2 producing gold properties in a well-developed reef, with gold hosted in volcanic sediment situated in a tropical rain forest region in Sulawesi Province in North East Indonesia. The area has been extensively surveyed and partially developed and operated, very successfully, by Newmont Mining, one of the world's largest mining groups. The Company generated earnings of \$5.7 mm on revenue of approximately \$11 mm in the 2020 financial year.

Company Highlights:

- In July 2019 the Company entered into a joint venture with a Taiwanese operator under the terms of which the operator agreed to construct and operate leach pads and associated processing facilities utilizing ore sourced from the Company's properties, with profits from gold sales shared between the parties on a 70/30 basis.
- In July 2021, Brookmount formally acquired the Moosehead project, a 5,000 HA property close to the Trans Alaska Highway in the highly regarded Tintian gold belt in the Yukon region of Canada.

- Revenue Grew 50% to \$455,622 Compared to Q1 2021.

New Rule Change Gives Retail Investors More Detailed Information

- Rule 15c2-11 sets forth the requirements for companies to have a public market, including the disclosure standards that must be met for a broker to quote securities on the OTC Markets.
- The OTC Markets have asked "No Information" companies to provide current information by June 30th.
- The OTC Markets will continue to review as many applications as possible (6-8 week application process).
- Issuers failing to meet the disclosure standards by September 28th will lose their publicly quoted market.
- The SEC has proposed an Expert Market for brokers to quote securities that do not meet the requirements of the rule.
