WALL STREET STOCK REPORT NEWSLETTER

Viscount Mining Corp. (OTCQX: VLMGF and TSXv: VML) is a Silver-Gold Explorer focused on demonstrating district scale potential on their 2 flagship projects in the historic mining districts at Silver Cliff, Colorado and Cherry Creek, Nevada. Their Silver Cliff Project has year round paved road access, and covers 944 hectares within Colorado's historic Hardscrabble Silver District, where high grade silver, gold and base metal production has previously occurred. Viscount based on local historical info, has consolidated sole ownership here over the past 5 years. For example, between 1967 and 1984, substantial exploration for the purpose of defining mineral inventories occurred. Major explorers were Freeport, Hecla, Homestake, Moly Corp, Coca Mines and Tenneco Minerals who between 1987 and 1990 completed a feasibility study for open pit mining of silver at the Kate Deposit. Their plans included a \$35M USD Milling Operation but the decision was reversed in 1991 when the parent was sold and the new owners divested their mineral interests.

Viscount's 2023 goals at Silver Cliff include updating a revised NI-43-101 Report on the Kate Silver Deposit, with continued drilling to follow. This past summer, Quantec Geoscience's 5-line TITAN MT survey indicated a significant geophysical foot print believed to be a large porphyry mineral system. Viscount's Geologists and Quantec Geoscientists recommend a drill program of up to 20,000 feet because a deposit with this large scale size and its extremely low resistivity, is likely explained by a huge system of interconnected mineralized fractures. The main body of the conductive anomaly starts at a depth of 450 meters and continues another 1.5 km, maybe deeper as this was the extent of the MT survey depth capability. The length of the anomaly is 1.4 km in the SW-NE direction with a width of at least 700 meters and an open interpretation to the untested NW. This represents a total volume of over 665,000,000m³. Quantec stated that survey results provided one of the lowest resistivity anomalies they have ever seen. Passiflora is a volcano caldera as is Newmont's Cripple Creek Colorado Mine, which is 82 miles away.

The Cherry Creek Project is located approx. 50 miles NNE of the town of Ely, in White Pine County, Nevada over 7,000 hectares. There are 20 past producing mines here now assembled under single ownership for the first time ever. Viscount have acquired all rights by purchasing from owners the patented claims which allow them the exclusive rights, to prospect and explore for, mine by underground or open pit methods, mill, prepare for market, store, sell and dispose of all ores and minerals on or under the described. On Jan 6, 2021, an earn-in agreement was signed with a wholly owned subsidiary of Centerra Gold Inc. (TSX: CG & NYSE: CGAU). Mark Abrams, Director and VP of Exploration at Viscount, stated: "Cherry Creek is one of the few remaining under- explored mining districts with geological attributes to the formation of both those in production at nearby Kinross's Bald Mountain Mine, and Newmont's Long Canyon Mine. We are excited to have Centerra bring their exploration and financial strength and join us in exploring the Cherry Creek project."

Argentum

Argentum 47 Inc. (OTC PINK: ARGQ) is a diversified holding company headquartered in the UK with market positions in the United Kingdom, United States, and Europe. The Company is engaged in three primary business industries: Technology, Web Based Services, and Marketing Solutions.

Technology offering includes proprietary AI (artificial intelligence) solutions for reducing advertisement spend and competitor analysis.

Web Based Services include data management, analytics reporting, and competitor research analysis.

Marketing Solutions provide a comprehensive suite of B2B and B2C lead generation marketing tools, ranging from brand awareness tools, like ads, to organic online search and conversion tools, like purchases and bookings.

Company Highlights

- Leader in utilizing disruptive marketing solutions with proprietary AI and automation technologies to support customers in their marketing journey
 - Rapidly growing market expected to double in size to \$14 billion by 2032
 - Blue Chip customer base
- Positioning to meet demand for Marketing-as-a-Service (MaaS) that provides clients with more comprehensive service offerings
 - Recurring revenue business model, expect to be completely SaaS in 2023
 - Highly experienced management team

Technology

- Our proprietary artificial intelligence (AI) technology creates campaigns at a fraction of the cost of a third-party service or conventional marketing strategies. Argentum's AI technology establishes its own advertising spending benchmark relative to direct competitors, allowing us to more effectively target and outspend them, ultimately reaching a larger audience for less.

Blue Chip Customer Base

Pharmagreen Biotech, Appoints Tyrell Crosby, a Professional Athlete, as Its Honorary Sports Ambassador

Mr. Tyrell Crosby, a professional NFL player, has joined the Pharmagreen team to be an Honorary Sports Ambassador for Pharmagreen's MaxGenomic™ Supplement product line. Tyrell will attend gatherings, trade shows, and other scheduled events selected by Pharmagreen, and will provide his endorsement of MaxGenomic™ products on various online social media platforms. As a professional athlete, Mr. Crosby is acutely aware of the need for mind and body wellness in dealing with injuries, rehabilitation, and recovery on a constant basis.

Nutraceutical supplements have long been a part of Tyrell's wellness regimen, and Pharmagreen's MaxGenomic™ Supplement is exactly formulated to support continued health in the face of body and mind stresses in everyone's life, from the top performing athlete to the everyday individual. Pharmagreen's proprietary blend is unique to the market, a nutrigenomic supplement for the utmost mind and body experience. Nutrigenomics, or nutritional genomics, concerns the relationship between nutrients, diet, and genetic expression. Pharmagreen created this new line of genomic supplements because health and wellness start on the cellular level. MaxGenomic™ Supplement will be available for purchase soon through Shopify, Amazon, other third-party online outlets, and the Company's own pending online store.

According to Zion Market Research, the nutraceutical industry is growing quickly, with sales expected to reach nearly \$750 billion by 2028, representing a compound annual growth rate of 8.8% over the next six years. As the consumer knowledge base of the tremendous wellness benefits from medicinal plants and fungi keeps expanding, so does the demand for such organically derived supplement products.

Pharmagreen is currently producing its first supply of MaxGenomic™ Supplement enteric capsules at a cGMP certified production facility in the U.S. All organic plant and fungi biomaterial is tested and certified for its contaminant-free content, and a certificate of analysis is matched with the suppliers.

Mr. Tyrell Crosby commented, "After having the opportunity to sample the MaxGenomic™ Supplement and making it part of my everyday wellness program, I knew Pharmagreen was onto something great. Nutraceutical products are very important supplements for all athletes serious about their performance and everyday body and mind balance. This is what I get with MaxGenomic™, and I am excited to be involved with Pharmagreen to help the company grow its business."

Mr. Ethan Styles, Pharmagreen's V.P. of Product Research and Development stated, "The MaxGenomic™ formulation is designed for individuals' overall wellness and it gives me great pleasure and satisfaction when I hear such an enthusiastic endorsement from a top professional athlete such as Tyrell Crosby using our product and experiencing the benefits and spreading the word. Nutrigenomics is an emerging and fascinating science on the cutting edge of our knowledge of human health and I am really excited to bring these unique combinations to market."

Peter Wojcik, CEO of Pharmagreen, stated, "Our partnership with Tyrell Crosby, a professional athlete dedicated to his own health and wellness as well as to others' wellbeing, is a great opportunity to have our product represented by a conscientious and knowledgeable brand ambassador. Hearing Tyrell talk about how MaxGenomic™ helps him with his wellness has been a validating experience for our team as we develop nutrigenomic products designed to bring balance and health to people's lives. We are very excited to be launching this product with Tyrell's help and endorsement."
